Sakura Precision Parts Limited

Annual Report 2025-26

Extract: management discussion and financial statements

Precision machined components for automotive and industrial customers. Plants at Pune and Chakan, Maharashtra.

Fictional company. Demo document prepared for the SiteSense prototype.

Management discussion and analysis

FY2025-26 was a year of investment for Sakura. Revenue grew 6% to Rs 436.7 crore, supported by steady demand from our two largest automotive customers.

Our plants operated at a capacity utilisation of 92%, up from 78% in the previous year. We now run close to full capacity across all three shifts at both plants.

During the year we commissioned a new five-axis CNC machining line at the Pune plant. The line is fully operational and is already contributing to output. The investment was funded through a term loan from our banking partners.

Inventory levels are healthy and in line with expected demand. We have built finished-goods stock ahead of new programmes scheduled to start in the coming year.

Margins were affected by higher steel prices during the second half of the year. We expect them to recover as price revisions with customers take effect.

Outlook

With the new line in place, we are confident of strong growth in FY2026-27. Our order book remains robust and our customer relationships are long-standing.
